*with the leading tile manufacturers from around the world. We supply indoor and outdoor tiles in ceramic, concrete, porcelain,*

Crackle glazed ceramic wall tiles in 15 deep crackle coloured glazes
MATERIAL: Ceramic
FINISHES: Glazed
THICKNESS: 7mm

FORMAT:

75x150mm

TECHNICAL CHARACTERISTICS:
Glazed ceramic tile with tiny surface cracks, deliberately created as a feature of the material. This particular process makes them acid-sensitive, with a tendency to absorb and, as a consequence, stain. After laying we therefore recommend stain protection treatment using solvent-based products. Anti-lime scale products should not be used for ordinary maintenance as they might dull the surface.
